To Whom It May Concern

Reference for Premier Groundwork's

Premier Groundwork's have undertaken numerous projects within Area 8 of the past 3 years, providing support in the delivery of a number of Providers Schemes and Routine Maintenance activities including Winter Service support.

Projects undertaken by Premier Groundwork's have been varied in nature, and include but are not limited to; drainage improvements, earthworks strengthening, kerbing and installation of new signs on steel or passively safe posts amongst other general improvement schemes.

Premier Groundwork's generally have undertaken works to a high standard, more often than not to programme; this in itself is commendable with programmed works nominally achieved during the past two winter seasons.

Health and Safety issues have been proactively managed by Premier Groundwork's management team, and they have worked closely with Area 8 to achieve Target Zero incidents throughout 2009/10.

Premier Groundwork's have managed / maintained a good level of resource, and Supervision staff who are keen to impress, customer focused and continue to work well with Area 8 staff and Operational team.

Accounts are always presented in accordance with the Target Price requirements, and settled reasonable quickly.

I would not hesitate to employ Premier Groundwork's in the future and am happy to discuss further if required.

Yours Faithfully
